

# FRP COMPOSITE SOLUTIONS

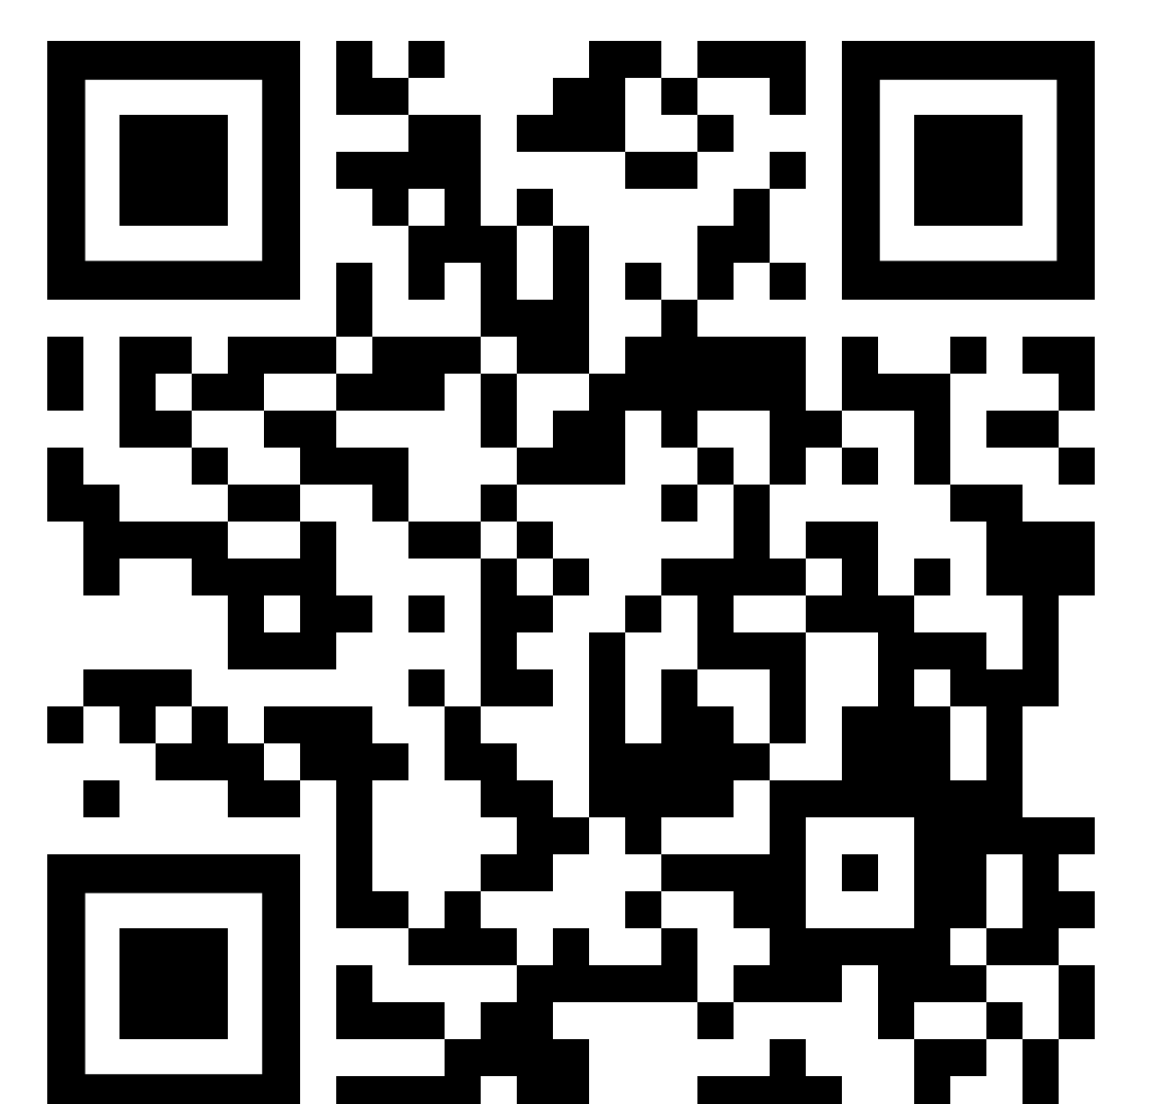

Advancing Malaysian Composite Engineering On The Global Stage

## Applications Across Industries

- ✓ Oil & Gas, Offshore & Onshore
- ✓ Power & Electrical
- ✓ Data Centre
- ✓ Water, Wastewater & Pollution Control
- ✓ Industrial & Public Infrastructure
- ✓ Chemical & Petrochemical
- ✓ Marine & District Cooling
- ✓ Food & Process Industries

TRUSTED WORLDWIDE.

### ABOUT COMPANY

Intralink Techno Sdn Bhd is a leading manufacturer of Pultruded Fiber-Glass Reinforcement Plastic (FRP/GRP) composite solutions, serving the oil & gas, power plant, petrochemical, cooling tower, marine, and infrastructure industries worldwide.

With over 27 years of industry experience, we have built a strong reputation for delivering high-quality, durable, and corrosion-resistant composite products. INTECH product range includes, Cable Support Systems, Structural Profiles, Gratings, Caged Ladder Systems, and custom engineered solutions designed to meet diverse industrial requirements.

Committed to quality innovation, and engineering excellence, Intralink Techno Sdn Bhd proudly delivers reliable composite solutions from Malaysia to customers around the world.

### PULTRUSION PROCESS

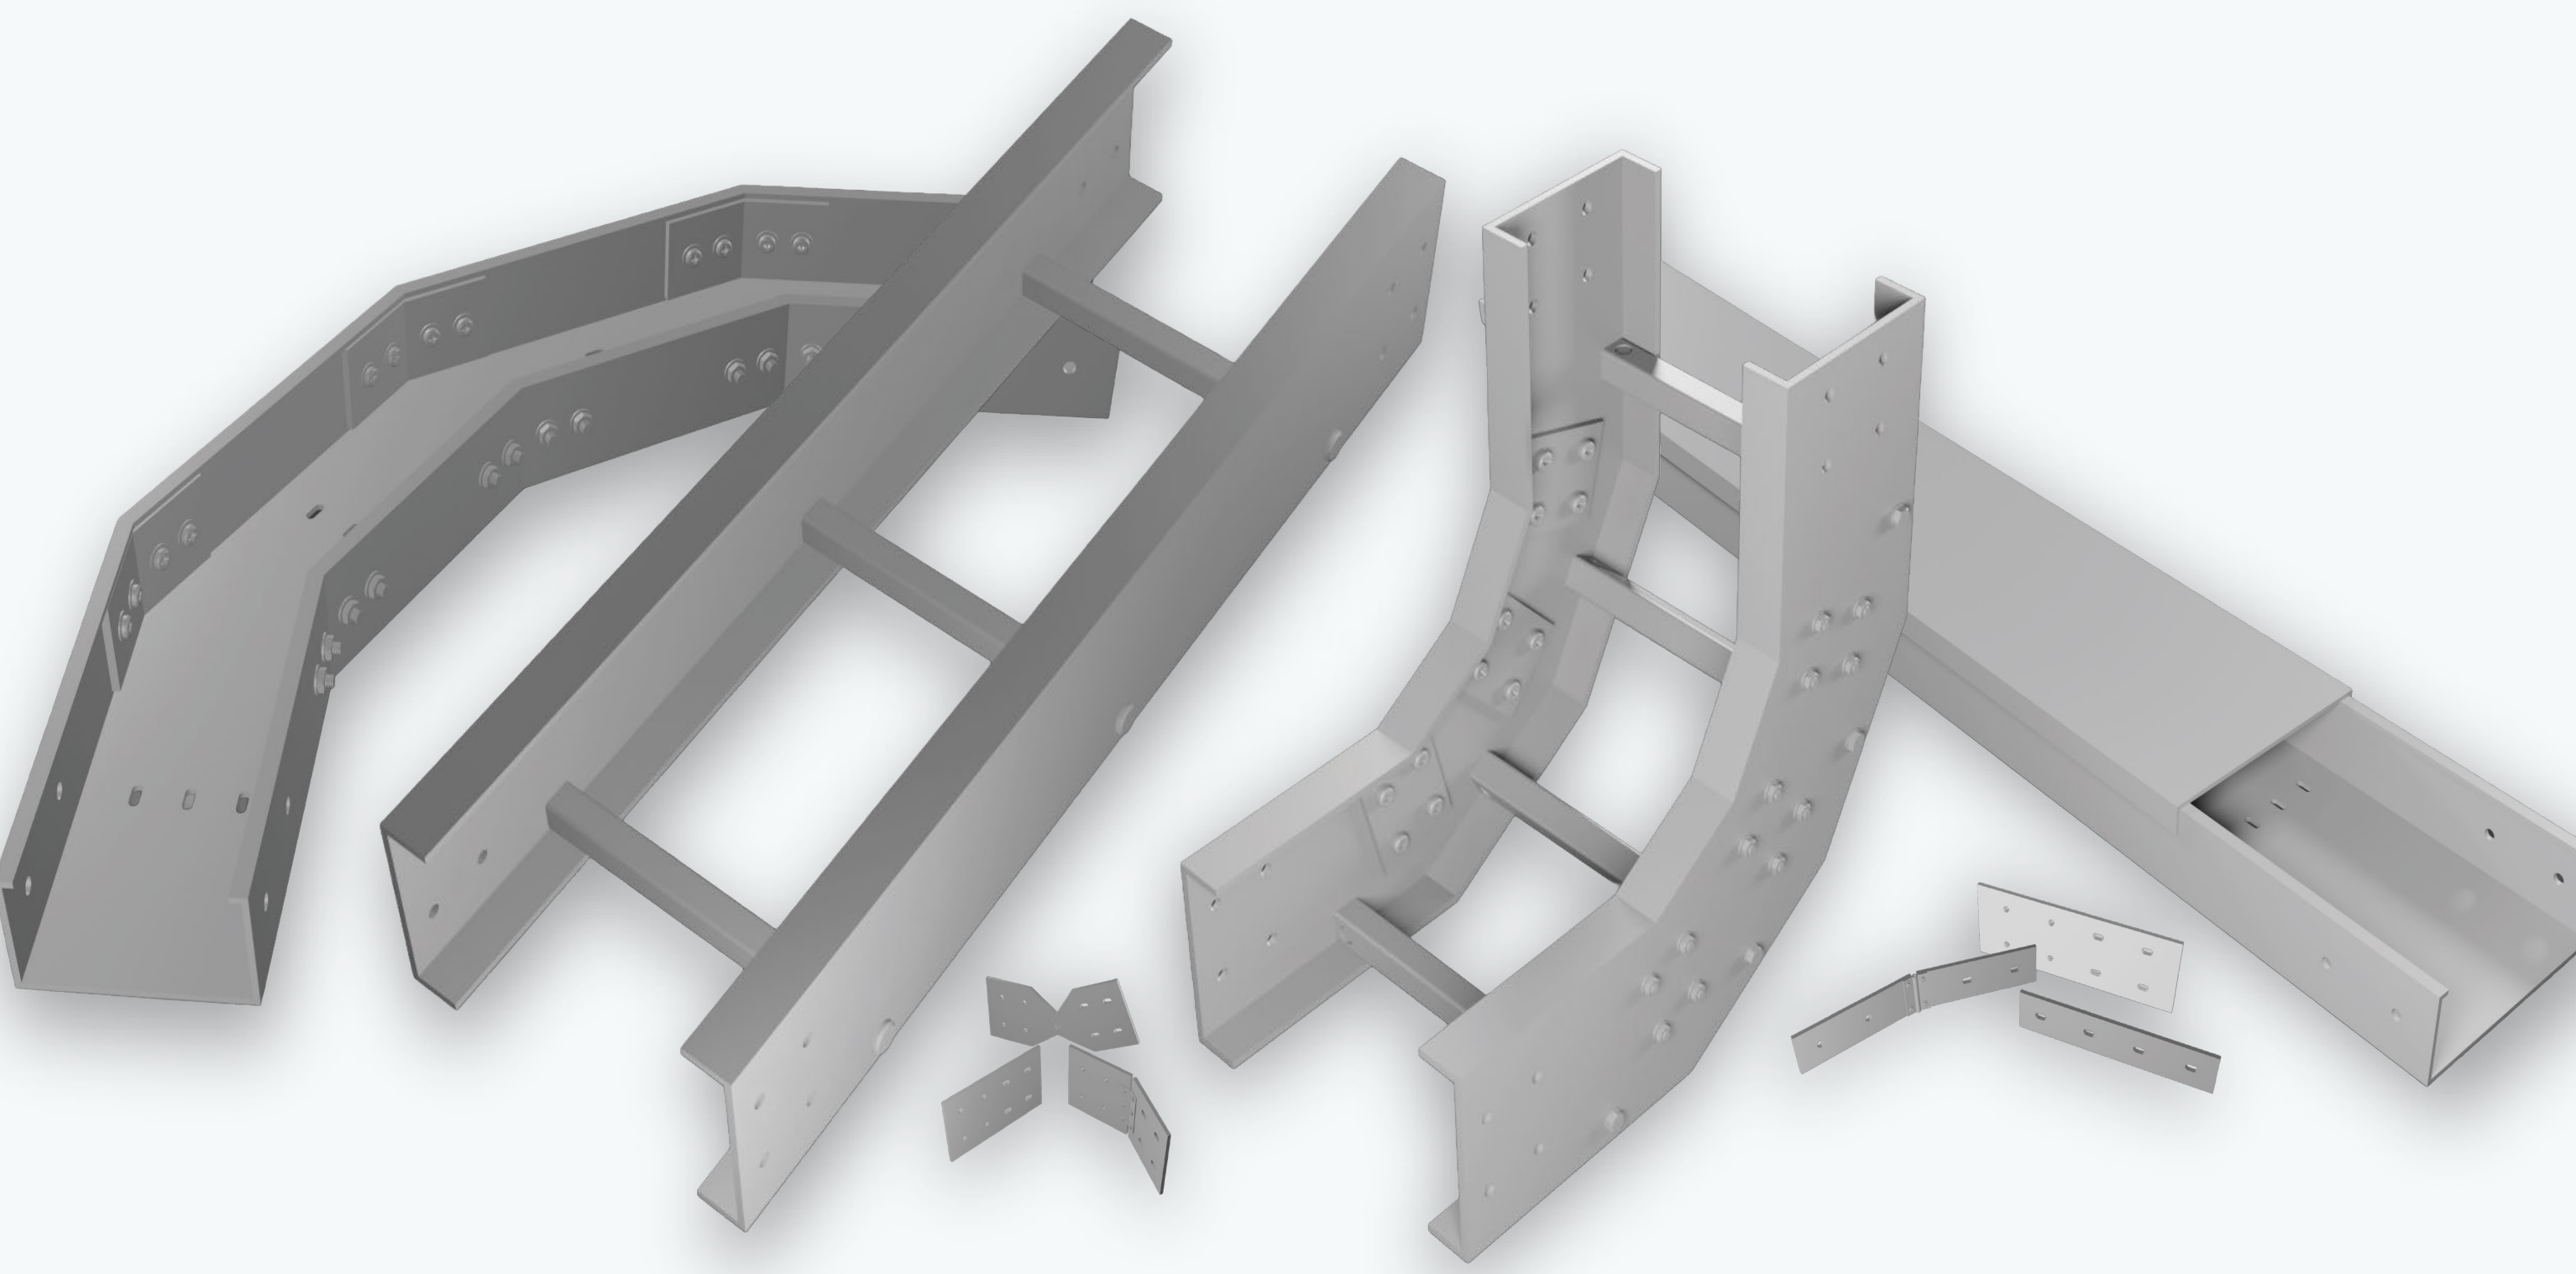

Pultrusion is a continuous manufacturing process that produces high-strength FRP profiles with uniform cross-sections, including I-Beams, Channels, Flat Bars, Rods, and Hollow Sections. Glass fibres are saturated with resin and pulled through a heated die where they are formed and cured into precise, durable profiles.

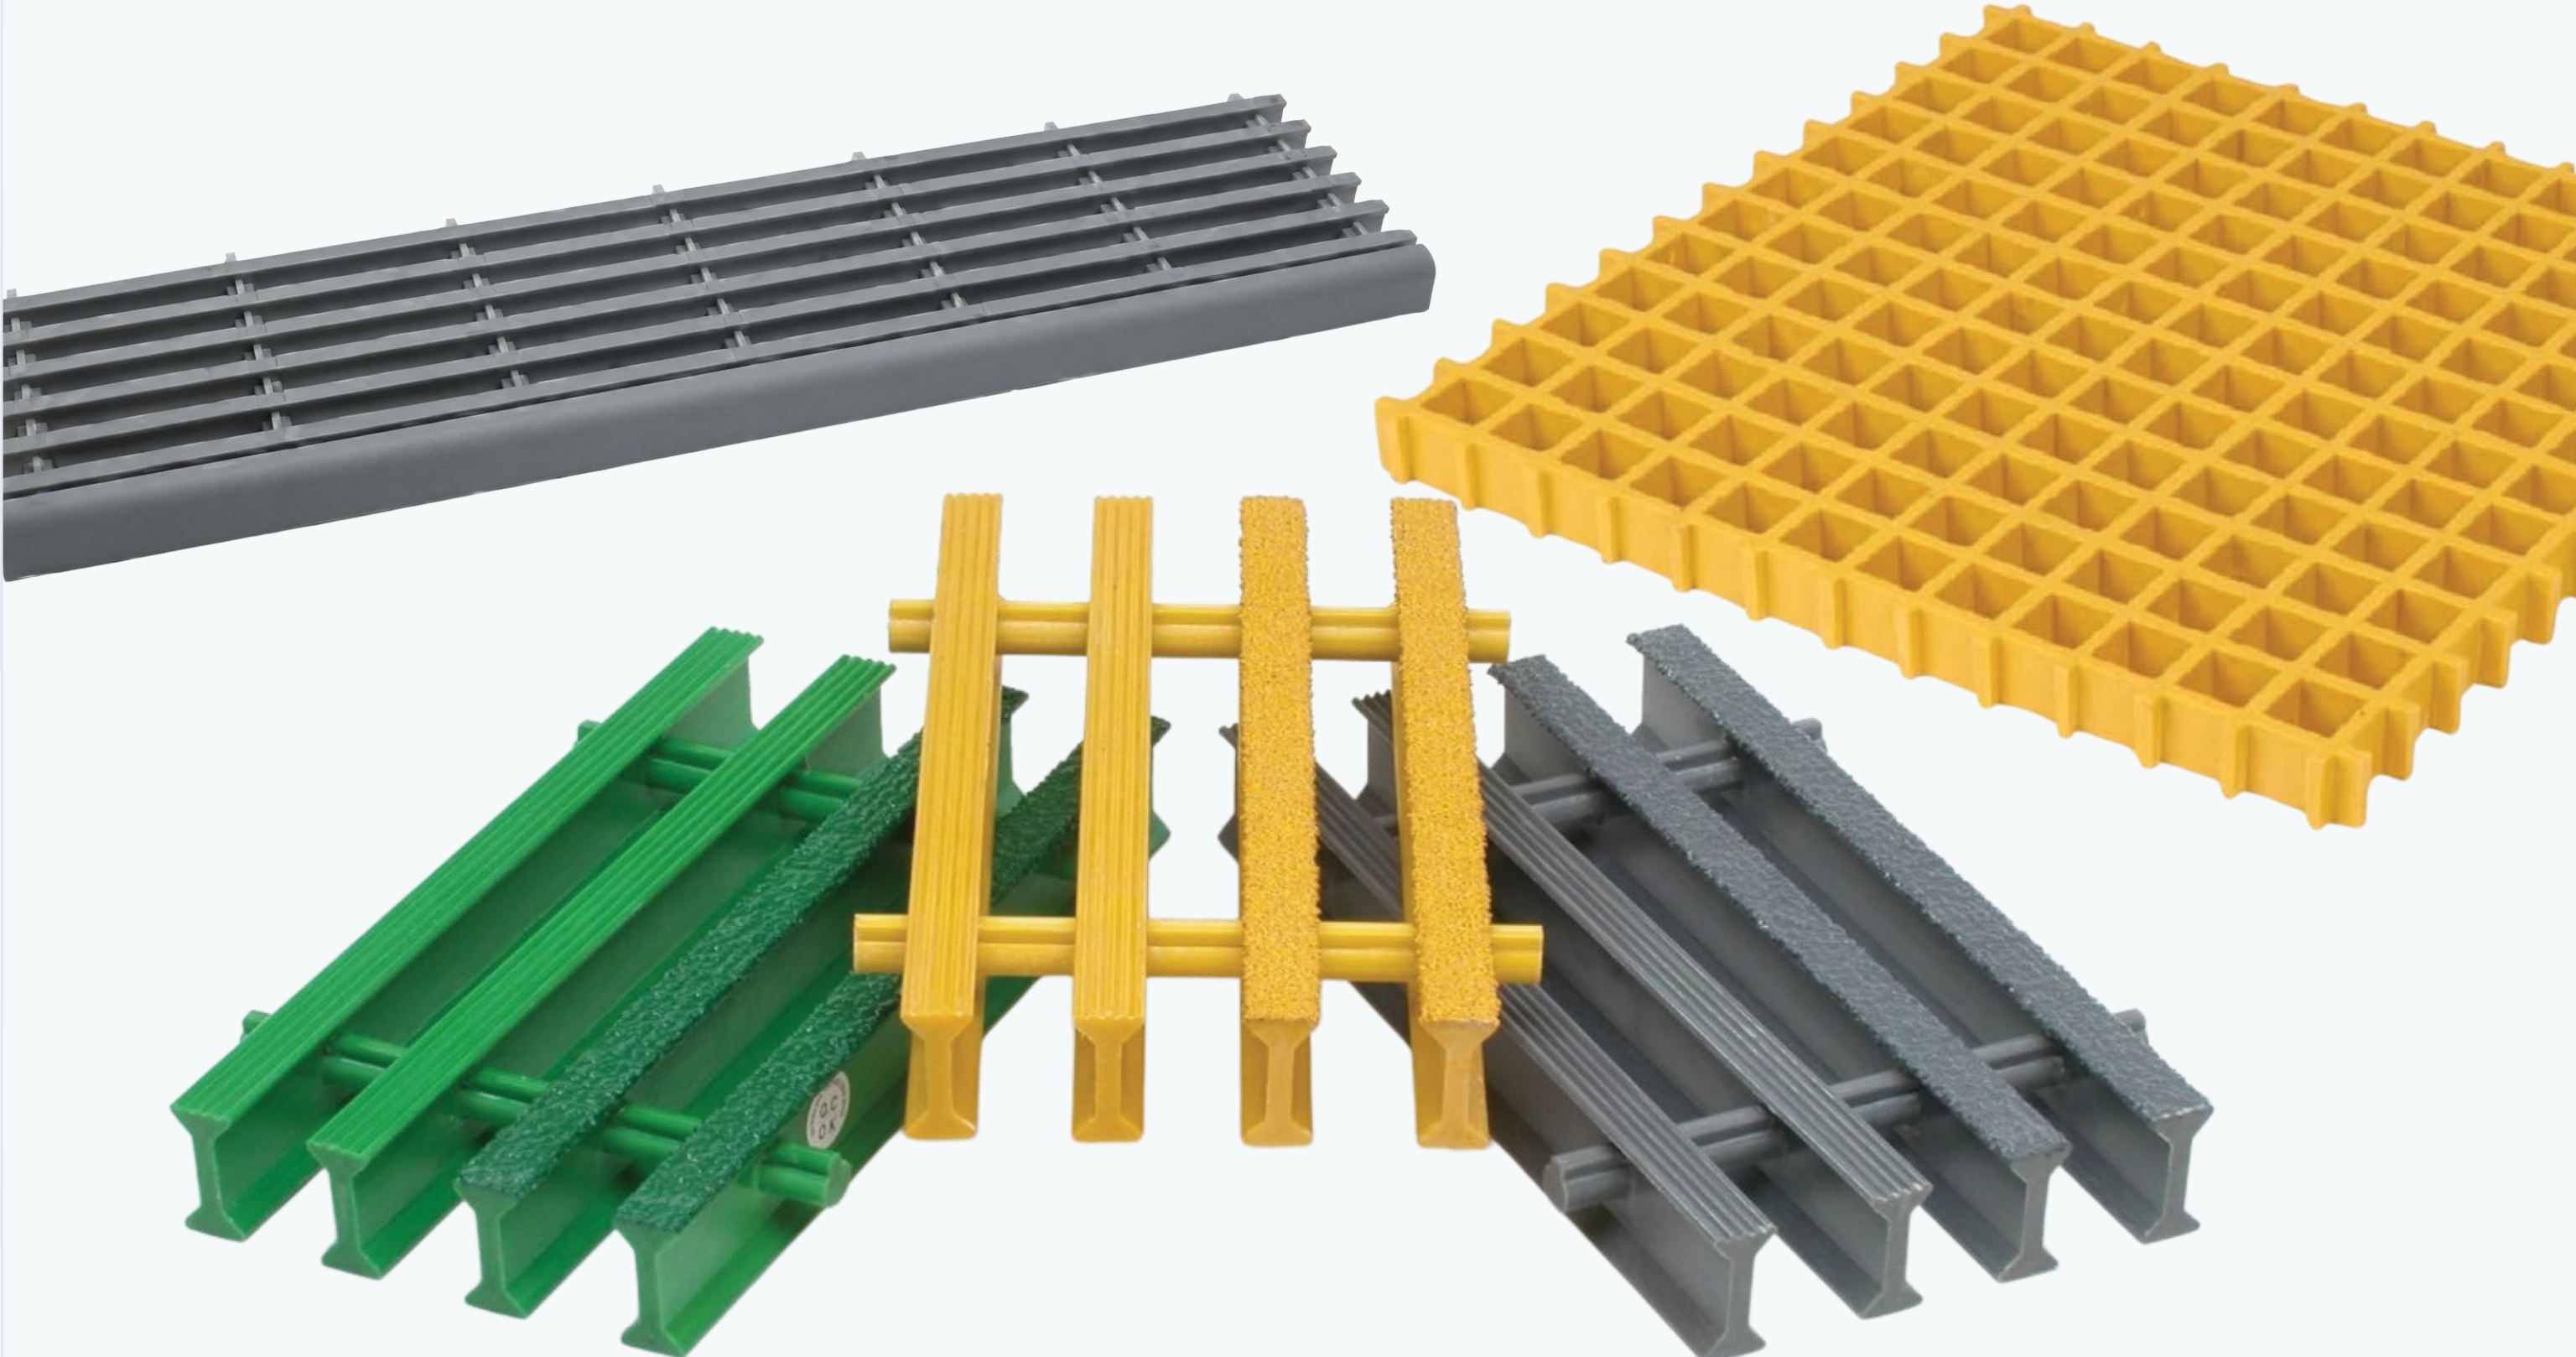

The process ensures consistent quality, excellent structural performance, and eliminates weak points throughout the product length.
